# Corporations of <Universe Name>

## Panbeam Industries

---

The oldest of the corporations to still be serving customers, Panbeam Industries was founded in 2045. Over the centuries Panbeam has prided itself on providing the highest quality fuels and accelerants to all, from Earth and beyond.

Panbeam:  
Your Friendly Neighborhood Gas Company.

---

# Apheleia Ltd.

---

APHELEIA LTD

The Best Products for the Lowest Price

Established in 2062 Apheleia Ltd manufactured some of the first commercial spacecraft on Terra, colloquially known as singleships. Throughout the centuries Apheleia has stuck around because spacers know quality when they see it.

**Aphelia, The best products for the Lowest Price.\***

\* Note lowest price is not a guarantee and Apheleia Ltd will not match or beat lower pricing schemes. This slogan is protected as per the Corporate Protection Act of 2256.

---

## Philomelus Industries

---

Founded in 2062 Philomelus produced Industrial spacecraft which were used primarily to explore the asteroid belt before permanent stations and asteroid colonies were established.

Philomelus was absorbed and made a subsidiary of Enkov Industrial in 2257. It is now the dedicated Electronic production and Hull manufacturing arm of Enkov Industries.

---

## Enkov Industrial

---

Enkov Industrial was founded in 2107 and is responsible for producing many of the orbital stations and Habitat domes found throughout the inner and outer solar system, as well as several popular heavy industrial ships. In 2257 Enkov absorbed both Philomelus Ind. and Engstrom Dev.

New orbital stations and parts are still manufactured under the Enkov Brand Name.

---

## Engstrom Development

---

The logo for Engstrom Development, featuring the words "ENGSTROM" and "DEVELOPMENT" stacked vertically in a bold, sans-serif font. The text is white and centered within a solid brown rectangular background.

ENGSTROM  
DEVELOPMENT

Founded in 2119 Engstrom Development pioneered the use of Bussard Ramjet technology, producing several workhorse spacecraft that utilized that propulsion system, some models of which are still produced to this day. In 2257 Enkov Industrial absorbed Engstrom and re-tasked it to mainly deal with research and development, but they still manufacture propulsion systems for their other subsidiaries under the Engstrom brand name.

---

## Klutotéhknix

---

Klutotéhknix was founded in 2143 and originally produced only Lidar systems, but in the early 2200's they developed their groundbreaking Soteria E.M. shielding. Now after several hundred years Klutotéhknix is still a forerunner E.M. technology and produces many of the core components used by other corporations in their starship technology.

---

## Funo-Watanabe Heavy Aerospace

---

Funo-Watanabe was founded in 2231 on Mars and was a key player in securing Martian independence from Terra. Producing Military grade vessels and weaponry for any and all who can pay has made FWHA a name that has lasted centuries.

Don't go to war unless you're in a Funo-Watanabe!

---

## Raschke Biotech

---

**RASCHKE BIOTECH**

*Remake Yourself*

Founded in 2319 Raschke Biotech pioneered the art of weaving DNA to the whims and wishes of their customers. Their breakout line of Anima Biomods first released 2352 and this line of alterations is still the most popular modification among spacers to this day. Among the top of the line Chymeral and Anima Biomids, Raschke also offer a full line of cybernetic augmentations that can be used standalone or in addition to our therapeutic and augmentation products.

Raschke:  
Remake Yourself

---

## Westwatch Biotech

---

Founded in 2320 on Mars, Westwatch Biotech became an industry leader in Gene Therapies and Splicing technologies. The Martian recession of 2352 led to a buyout of Westwatch by Raschke Biotech.

Westwatch now acts as a subsidiary and the main R&D branch of Raschke.

---

## Nymphai Hyperboreioi

---

2438 was when Nymphai Hyperboreioi, est 2321, perfected its Cold Fusion Engine technology, this revolutionary discovery was a turning point in human expansion into space. Today most if all modern installations of human habitation will be utilizing a NH C.F.E. from small ships to orbital stations, planetary domes to generation ships.

---

# Wyke-Tindal Amalgamated

---

WYKE-TINDAL AMALGAMATED  
Creating a Better Tomorrow

Resulting from a merger of two scientific powerhouses in 2438 Wyke-Tindal Amalgamated continued pushing the envelope within the fields of Reactionless Drives, Suspended Animation, and Artificial Intelligence. Its great strides in the field of A.I. led to Wyke-Tindal finding a weakness in, and eventually ending widespread ARGUS events of 2613

Wyke-Tindal:  
Creating a Better Tomorrow

---

## omegaCom Systems

---

In 2615, following a massive attack on networked systems, a consortium of communications companies pooled their resources and founded omegaCom Systems headquartered on Terra. oCS, with their vast wealth of knowledge in the field of communications systems, quickly rebuilt the damaged infrastructure throughout the inner system and belt.

---

# Cytek Cybernetics

---

Founded in 2648, CyTek Cybernetics had a simple mission, produce high quality and affordable cybernetics, by Belters, for Belters.

CyTek Cybernetics:  
Augment Yourself.

---

## TIE Media Group

---

In 2782 several Industry leaders came together to form the Triton, Io, Eris Media Group with headquarters located on stations orbiting those three astral bodies. Handling the production, distribution and sale of many types of media from music to holovids, TIE Media has gained popularity with the outer sol system.
